

LR-Newaz Master Tutorial Script

Director's Cut: Camera Angles, Split-Screen VFX & Before/After Demos

Director's Cinematic Specifications

Master reference for video editors, composers, and AI video generators (Veo 3 / Gemini Video).

Before / After AI Demonstrations

- * AI Demo 1: Historical Scan to Clean OCR: Cinematic vertical split wipe. Left side shows 100-year-old faded yellowed parchment deed with ink stains. Right side displays Otsu adaptive binarized high-contrast text with recognized digital Bengali typography and 98% confidence badges.
- * AI Demo 2: Cursive Bengali Handwriting (HCR): Split-screen macro zoom. Left side features degraded cursive ink notes from land registrar margin. Right side highlights individual token chips: ' ' (Verified, 99.4%) with interactive correction tooltip.
- * AI Demo 3: Cadastral Survey Sheet to Emerald Polygon: Holographic 3D elevation wipe. The flat 2D British-era survey map transforms into an interactive GIS vector canvas. Target parcel Dag 402 pulses in radiant emerald green with golden boundary vertices.

Animated Callouts & VFX Guide

- * Touch Tap Indicator: Translucent white ripple expanding to 48dp with 300ms fade-out upon every user click.
- * Focus Glow Box: Rounded amber/emerald border (#F59E0B / #10B981) highlighting active buttons with 2px stroke.
- * Laser Scanning Line: Cyan horizontal laser beam scanning across documents during OCR & HCR processing.
- * Success Checkmark Stamp: Gold foil holographic badge bursting with soft sparkles upon export completion.
